3rd WOMEN'S CARP FISHING WORLD CHAMPIONSHIPS

25 - 29 september 2023

Lac de PANNECIÈRE – CHAUMARD - FRANCE

Dear friends, dear colleagues,

It is with great honour, joy and pleasure, that our French Federation of Sport Fishing Carp Commission will host the 3rd Women's Carp fishing World Championship in France from 25 until 29 September 2023.

We are very proud to announce, that we will make every effort to make this new international edition, which we hope, should bring together more than 10 nations. a superb success and a great celebration for women's carp fishing.

Everything will be done so that you enjoy your time here with us. Everything will be simple without surprises from the moment you arrive until the moment you leave. The key words will be: clarity, simplicity, fairness and of course sportsmanship and friendliness.

For this 3rd edition, the 2nd one organised by the French federation, our commission has selected the beautiful and amazing Lac de PANNECIERE located in the centre of France, in the natural massif of MORVAN, more precisely in the department of NIÈVRE in BURGUNDY (FRANCHE-COMTÉ). Given its 500 hectares and its extraordinary carp herd, the lake is the perfect location for our competition. It's a public lake managed by the fishing association of CHATEAU-CHINON and the Fishing Federation of la NIÈVRE, both partners of the World Championship. We are confident that it will meet all the expectations of our high-level competitors.

I personally want to thank the managers of the FIPSeD (International Federation of Freshwater Fishing), to trust us again for the organisation of this Championship. I would also like to thank all the local authorities, the NIÈVRE federation, local fishing association, the municipalities, the hosts, the press, sponsors and partners for their help and their implication not to mention all the members of the FFPS (French Federation of Sport Fishing) and GN Carpe (Carp National Group): Steering Committee, staff, referees, cooks, volunteers, and all those who work in the shadow.

But above all I would like to thank you: nations, delegates, captains and athletes, who will take part in this event. Your performances, your sportsmanship, your fair-play and your human qualities will make this international competition and meeting an exceptional event.

All the organisation team and everyone at our French Carp commission wish you a warm welcome.

Good fishing, good luck and have a nice stay in MORVAN.

Fernando DE CASTRO
Président FFPS CARPE

Informations sur le Lac de PANNECIÈRE :

L'ouvrage :

Le lac-réservoir de PANNECIÈRE, situé dans le Morvan, a été mis en service en 1949. C'est le plus ancien des ouvrages gérés par l'EPTB (Établissement Public Territorial de Bassin) Seine Grands Lacs.

Son action est déterminée par le rythme des saisons. Le barrage de type « à voûtes multiples et contreforts » adapté à la forme évasée de la vallée.

En hiver et au printemps, les eaux sont stockées dans le lac-réservoir en suivant une courbe de remplissage. En période de crue, des prélèvements supplémentaires sont effectués pour limiter les risques d'inondations à l'aval.

En été et en automne, l'eau est restituée à l'Yonne pour éviter un débit trop faible dans la rivière et permettre notamment les prélèvements pour la production d'eau potable et l'amélioration de la qualité des milieux aquatiques. Ces restitutions d'eau sont régulées en aval par un bassin de compensation de 370 000 m³ géré par EDF. Une prise d'eau permet en outre, à partir de ce bassin, l'alimentation du canal du Nivernais.

La gestion

Le soutien des étiages, qui a lieu en principe de mi-juin à fin octobre, peut fournir une moyenne de 5,7 m³/s supplémentaires de soutien des débits de l'Yonne pour un débit naturel estival moyen de 2 m³/s.

En période de crue, le lac-réservoir peut stocker une grande partie du débit de la rivière, limitant ainsi les inondations dans la vallée de l'Yonne en aval de l'ouvrage. L'exploitation du lac-réservoir est déterminée par un règlement d'eau défini par arrêté inter-préfectoral, établi après consultation des organismes de bassin et à l'issue d'une enquête publique. Ce règlement définit les différents volumes d'eau que doit contenir l'ouvrage, ainsi que le débit minimum à maintenir dans l'Yonne (débit réservé) et le débit maximum à ne pas dépasser dans la mesure du possible (débit de référence).

Sur ces bases, le remplissage du lac, qui démarre en principe le 1er novembre, s'effectue suivant une courbe définissant des objectifs mensuels. Le remplissage s'achève mi-juin. De mi-juin à fin octobre, le réservoir est progressivement vidé. Cette vidange peut se prolonger en novembre et décembre en cas de saison très sèche. Le début du remplissage ou du soutien d'étiage peut varier selon les nécessités dues aux aléas climatiques. Le nouveau règlement d'eau a été approuvé le 27 janvier 2015.

ANTI-DOPING INFORMATION TUE REQUESTS

The athletes participating in the Championship, with the registration, implicitly accept all WADA anti-doping rules.

Athlete whose illness or condition requires treatment with a prohibited substance or method must apply to CIPS for a Therapeutic Use Exemption (TUE) following the CIPS strict TUE application process.

He/she shall then use the application form, which can be downloaded from the ITA website: https://ita.sport/uploads/2021/02/ITA_TUE_Form.pdf

The TUE request has to be sent to the following address: tue@ita.sport

Athletes must therefore consult the Prohibited List https://www.wada-ama.org/sites/default/files/2022-09/2023list_en_final_9_september_2022.pdf

If the TUE is granted, the athlete will then be permitted to use the medication during the period of validity of the TUE without committing an Anti-Doping Rules Violation (ADRV).

Regardless of whether a TUE has been granted or not, athletes should always declare on the doping control forms filled out during sample collection any medications and supplements taken within the seven days prior to sample collection, and any blood transfusions in the three months prior for blood samples.

If a TUE has already been granted by a NADO or by a RADO, the Athlete in question does not have to apply for any additional CIPS TUE, as CIPS recognizes all TUE granted by NADOs and RADOs.

Map of the lake and the sectors for the Championship:

Unfortunately, we cannot organise official competitions before the world championship. But it is possible to train whenever you can until 15 days before the event.

Be careful if you want to train, you have to buy a fishing card to be in compliance with the legislation.

Several cards exist: a weekly card (holidays, week) or an annual card.

You can buy these cards at the following address:

<https://www.cartedepeche.fr/>

It's very important to select the following fishing association:

CHATEAU-CHINON (58120) (Campagne or Ville) "Château-Chinon « La truite morvandelle ».

You should also know that the legislation of the lake does not allow night fishing everywhere. There are some parts of the courses that are opened.

Feel free to look at the map below to see the different parts.

REGISTRATION FEES:

- ⇒ FIPsed tax: € 150,00
- ⇒ Registration fees : € 1450,00
